WHAT IS MACHINE LEARNING?

- Branch of AI and computer science
- Proper usage of Data & Algorithms
- In order to improve the efficiency of model

TYPE OF ALGORITHMS

- Helps in building the models.
- Broadly classified as :
 - 1) Supervised Learning
 - 2) Unsupervised Learning

- Regression:
- Y(Output Prediction Values) will have continuous values
- Eg: House Price Prediction, Literacy Rate Prediction......

- Classification:
- Y Value will have Yes/No & Binary Classifications.
- Eg:
